Luna Innovations Incorporated Reports First Quarter 2014 Financial Results

Company posts net income of \$8.5 million following sale of fiber optic medical shape sensing business; products and licensing revenues increased 22% compared to first quarter of prior year

(ROANOKE, VA, May 8, 2014) - Luna Innovations Incorporated (NASDAQ: LUNA) today announced its financial results for the first quarter ended March 31, 2014.

Following the sale of its fiber optic shape sensing technology for medical applications in the first quarter of 2014, Luna reported a net income attributable to common stockholders of \$8.5 million, or \$0.49 per diluted common share, compared to a net income attributable to common stockholders of \$2.8 million, or \$0.17 per diluted common share for the first quarter of 2013. Net income for the first quarter of 2014 includes an after-tax gain of \$9.5 million related to the sale of the medical shape sensing business. Net income for the first quarter of the prior year includes an after tax gain of \$4.0 million related from the sale of the company's secure computing and communications group in March of 2013.

Total revenue increased by 9% from \$4.1 million in the first quarter of 2013 to \$4.5 million in the first quarter of 2014, driven by growth in the company's products and licensing segment, which increased 22% compared to the first quarter of 2013, reflecting increased sales of fiber optic test and measurement products. Technology development revenue also increased by 2% compared to the first quarter of 2013. Gross profit increased to \$1.6 million for the first quarter of 2013, resulting in an improvement in gross margin to 35% for the first quarter of 2014 compared to gross margin of 28% in the first quarter of 2013. Operating expenses were relatively unchanged at \$3.5 million for the first quarter of 2014 compared to \$3.4 million for the first quarter of 2013.

The company reported a loss from continuing operations of \$1.0 million for the first quarter of 2014, compared to a loss from continuing operations of \$1.3 million in the first quarter of 2013. Adjusted EBITDA, a non-GAAP measure, which is earnings before interest, taxes, and non-cash expenses of share-based compensation, depreciation, amortization and warrant expense, improved to \$(1.4) million for the first quarter of 2014, as compared to \$(1.6) million for the first quarter of 2013.

"With the sale of the medical shape sensing business in the first quarter, we significantly improved our liquidity, allowing us to focus on our key growth initiative of fiber optic sensing for strain and temperature," said My Chung, president and chief executive officer. "We ended the first quarter with \$10.9 million of cash on hand and in April received the second installment of \$6 million from the sale. With this enhanced working capital, we are positioned to continue to expand our sales and marketing and our product development efforts toward the growth of our ODiSI platform for distributed sensing, as well as to pursue future growth opportunities through an ongoing pipeline of technologies within the technology development segment of our business."
